SUMMARY

I have led international software projects and improved clients' ways of working through data and software. My experience also includes 16 years of running my own company. I am building on this experience through studies in Innovation Management and Data Engineering.

I am looking for work where I can combine innovation with the use of data and help put solutions into practice. I want to complete my master's thesis as part of the work and continue with the organisation afterwards.

EDUCATION

- **University of Eastern Finland**, Kuopio | Master's studies, Business Administration (Innovation Management) | 2026-
- **University of Eastern Finland**, Kuopio | B.Sc. (Tech.) studies, Data Engineering | 2026-
- **Helsinki University of Technology (now Aalto University)** | Master of Science (Technology), Department of Civil and Environmental Engineering | 2001

SELECTED PROJECTS

Ormen Lange, Norway: from survey data to dredging robot guidance

Project Manager, Trimble Solutions Sandvika AS, 2004-2005

- Built a 3D seabed surface model from ROV survey data that compared the measured seabed with the design, and transferred the data directly to the guidance system of the dredging robot.
- Automated the data transfer from survey to robot: four steps into one.
- The system dredged the seabed along the gas pipeline route with centimetre accuracy.
- Coordinated the coding team in Bangkok, installed the system at sea and trained the client's operators to use it.

AI-assisted design in Revit

Client assignment, 2026

- Connected Autodesk Revit to an AI assistant through the MCP interface.
- Designed an electric forklift charging building for a local hardware store in one day: Revit model, drawings and a bill of quantities with order codes. The material was used for the contractor's tender calculation.

Access control on Azure

Own project, published

- Developed a service in which access to paid content is checked on the server. The implementation includes Azure Static Web Apps, sign-in with a Microsoft or GitHub account and acceptance tests for the access checks.

Digital site quality control

Kuopion Korjausinsinööri Oy, client Rakennuspalvelu Saneko Oy, 2021-2022

- Moved site quality control from paper forms to a cloud service with checklists used on mobile devices. Standardised reports were produced weekly.

Owner-side construction management

Kuopion Korjausinsinööri Oy

- Represented clients' interests and provided construction management and site supervision for new-build and renovation projects in the Kuopio region, with project values up to approximately €10 million.
- **Villa Särkiniemi, Kuopio, 2022-2023:** represented the client's interests in the Autism Foundation Finland's supported housing project. Three log buildings, about 1,840 m² and 24 place of residence. The site was awarded LEED certification at the end of the project.
- **Päiväranta district heating plant renovation, Kuopion Energia, 2024-2025:** responsible for construction management and supervision of a project carried out with a circular economy theme. Completed on schedule and on budget.

EXPERIENCE

Kuopion Korjausinsinööri Oy, Kuopio

Founder & CEO | 2010-07/2026

- Ran the company for 16 years and worked as a trusted consultant within client organisations. Services included owner-side construction management, supervision and management consulting in construction and tourism.
- Responsible site manager in 60+ projects and main and structural designer in 30+ building permit projects. Also handled design, construction management and supervision in 80+ renovation projects.
- Rolled out software in client organisations, trained users and guided them in using AI and writing prompts.
- Event coordinator for the Puijo tourist area Halloween event, in cooperation with the client. Ticket sales grew 2.5-fold from 2023 to 2024.

Outlier.ai

STEM Test Engineer | 01/2026-05/2026 | Remote

- Applied engineering science to designing test cases for training and testing AI models.
- Produced structured expert feedback for model training (human-in-the-loop).
- Also worked in internal quality assurance.

Trimble Solutions Sandvika AS (Vianova Systems), Sandvika, Norway

Project Manager & Partner | 2005-2010

- Led software research, development and innovation projects. Teams worked in Europe and in Bangkok and Hanoi.
- Led the internationalisation and localisation of a software suite used in 22 countries.
- Trained client teams in Europe in software roll-out and in using the software to streamline design processes.
- Board member of Vianova Systems Spain S.A.; worked on its business development.

Arkance Systems Finland Oy, Espoo

Project Manager & Consultant | 2001-2005

- Localised products from an international infrastructure design software suite for the Finnish market. My responsibilities ranged from requirements specification to sales.
- Prepared software requirements specifications based on clients' working practices for international software teams across EMEA.
- Delivered implementations, training and process consulting for public and private sector clients, and automated client workflows.

Finnish Maritime Administration, Helsinki

Design Engineer, engineering student | 1999-2001

- Designed navigation fairways and wrote the master's thesis on improving the efficiency of winter navigation.
- Worked on product development of the Vid Civil 5 design software.

CERTIFICATIONS & COURSES

- Structural Design Qualification, Eurofins Expert Services Oy, C-30199-43-26 | 05/2026
- Prompt Engineering Mastery, Coursera | 02/2026
- Introduction to AWS Solutions, AWS Training & Solutions | 02/2026
- Microsoft Learn: Azure Fundamentals (AZ-900) learning paths | 2026. [Achievements](#)

LANGUAGES AND INTERESTS

Finnish: native · English: fluent · Spanish and Swedish: intermediate · French: basics

I balance work with time outdoors and endurance sports, particularly marathon racing. I have also completed an Ironman.
